PROFESSIONAL SUMMARY

Full-Stack Software Engineer with experience building web applications, fintech platforms, and backend systems across frontend and backend environments. Skilled in React, Next.js, TypeScript, Nest.js, Node.js, PostgreSQL, Redis, Docker, and BullMQ. Experienced in building secure financial workflows, real-time systems, and scalable web applications, with strong interest in backend systems, distributed architectures, and system design.

SKILLS

- Languages:** TypeScript, JavaScript, Python
- Frontend:** React.js, Next.js, React Native, Tailwind CSS, Zustand, Redux
- Backend:** Node.js, Express.js, NestJS, REST APIs
- Infrastructure:** PostgreSQL, Redis, Docker, MinIO, BullMQ, Socket.IO
- Concepts:** Distributed Systems, API Gateways, Rate Limiting, System Design
- Tools:** Git, GitHub, Postman
- Soft Skills:** Effective Communication, Collaboration, Attentiveness to details, Critical Thinking, Problem Solving.

PROFESSIONAL EXPERIENCE

Frontend Developer – TECHSERVICES LIMITED April 2025 – December 2025
Lagos, Nigeria

- Built frontend features for a core banking system supporting customer onboarding, transactions, and account management workflows, improving operational efficiency by over 70%.
- Developed user-facing modules for a digital banking platform focused on account operations, transaction history, and online transfers.
- Integrated real-time APIs, secure authentication flows, and role-based access control systems, reducing transaction latency by over 60%.
- Translated Figma designs into responsive production-ready interfaces using reusable component-based frontend architectures.
- Collaborated with frontend and backend engineers on scalable application architecture and feature delivery for fintech products.
- Technologies:** React, Next.js, TypeScript, Tailwind CSS, Material UI

Software Developer – EDALA REALTORS July 2025 – September 2025
Lagos, Nigeria

- Built the EDALA Realtor Management Platform using Next.js and MongoDB, supporting onboarding, sales submissions, referrals, and application workflows for 1000+ realtors.
- Developed frontend interfaces and backend API routes for dashboards covering sales tracking, commissions, referrals, and team performance management, reducing manual tracking processes by over 50%.
- Implemented authentication workflows including email verification, password recovery, profile management, and account security features.
- Built admin-facing modules for approvals, analytics, operational reporting, and realtor oversight across multiple user accounts.
- Built backend APIs, database workflows, and responsive frontend dashboards across the full application stack.
- Technologies:** React, Next.js, TypeScript, Tailwind CSS

Frontend Developer – ERNEXT GADGETS March 2025 – April 2025
Lagos, Nigeria

- Developed responsive frontend interfaces for an e-commerce platform supporting product browsing, cart management, checkout, and order tracking.
- Built admin-facing product management features and role-based user workflows.
- Improved frontend responsiveness and state management stability across key user flows.
- Collaborated with another software developer to deliver features and optimize frontend performance.
- Technologies:** React, Next.js, TypeScript, Tailwind CSS, Vite

PROJECTS

QueueWatch — Operational Diagnostics & Observability Platform Next.js • NestJS • PostgreSQL • Redis • BullMQ

- Built a real-time observability platform for monitoring queue health, worker activity, retries, failures, and dead-letter queues.
- Developed telemetry ingestion services and REST APIs using NestJS, PostgreSQL, and Redis for operational metrics collection.
- Designed Next.js dashboards and implemented BullMQ failure tracking, retry monitoring, and DLQ recovery workflows.

GitHub: <https://github.com/o1-spec/queuewatch> **Live URL:** <https://queuewatch-web.vercel.app/>

PneumoDetect AI — AI-Powered Medical Diagnosis Platform NestJS • PostgreSQL • TensorFlow • React Native

- Built backend services for managing patient records, scan uploads, authentication workflows, and AI inference requests.
- Designed REST APIs and PostgreSQL data models supporting scan history, diagnostic results, and clinician workflows.
- Integrated a TensorFlow-based pneumonia detection model and automated image processing pipelines for chest X-ray analysis.

EDUCATION AND CERTIFICATIONS

Lagos State University — BSc, Computer Science August 2026
Coursework: Computer Programming, Algorithms and Data Structures, Computer Architecture, Numerical Methods, Discrete Mathematics, Computer Networking

AltSchool Africa May 2023 – May 2024
Software engineering student,
Completed courses covering Frontend Engineering, Technical Writing, Data Structures, and Algorithms
